

# LOUISIANA COLLEGE

## LAC Portal LOGON INFORMATION

**The Louisiana College Network requires registration of all network devices.**

To register you pc, laptops, or tablets please follow the steps shown in the screen shots below. The process is the same for every device.

You will be prompted for you user name and password. Faculty, Staff, and Students please input your LC network user id and the corresponding password. Guest access registration is only for those users that are truly guests or visitors to the campus and not students, faculty, or staff.

The NAC registration process will assess your computer's operating environment and grant you access if you meet the specification of operation on the LC network. You will be prompted to install a NAC agent. Guests need to choose the dissolvable agent while faculty, staff, and students must choose the persistent agent. To meet the specifications of operation on the LC network you must have valid licensed operating system and software applications and an up to date licensed antivirus application. If you fail these categories you will be placed in quarantine and given limited network access to allow you to mitigate these problems. Once the problems are resolved you will then be allowed access to the network.

The registration process will occur at the beginning of every semester.

**Example:**

Name: John Mark Doe

Student ID: 1234567

Date of Birth: January 1, 1986

Network User ID: <firstname>.<lastname>

Password: Generated randomly and given to you when you were admitted by admissions.

For any questions or help with this process, contact the Office of Information Technology at 487-7181.

It is recommended that you change your password upon your first logon. Be sure to remember your new password when you change it.

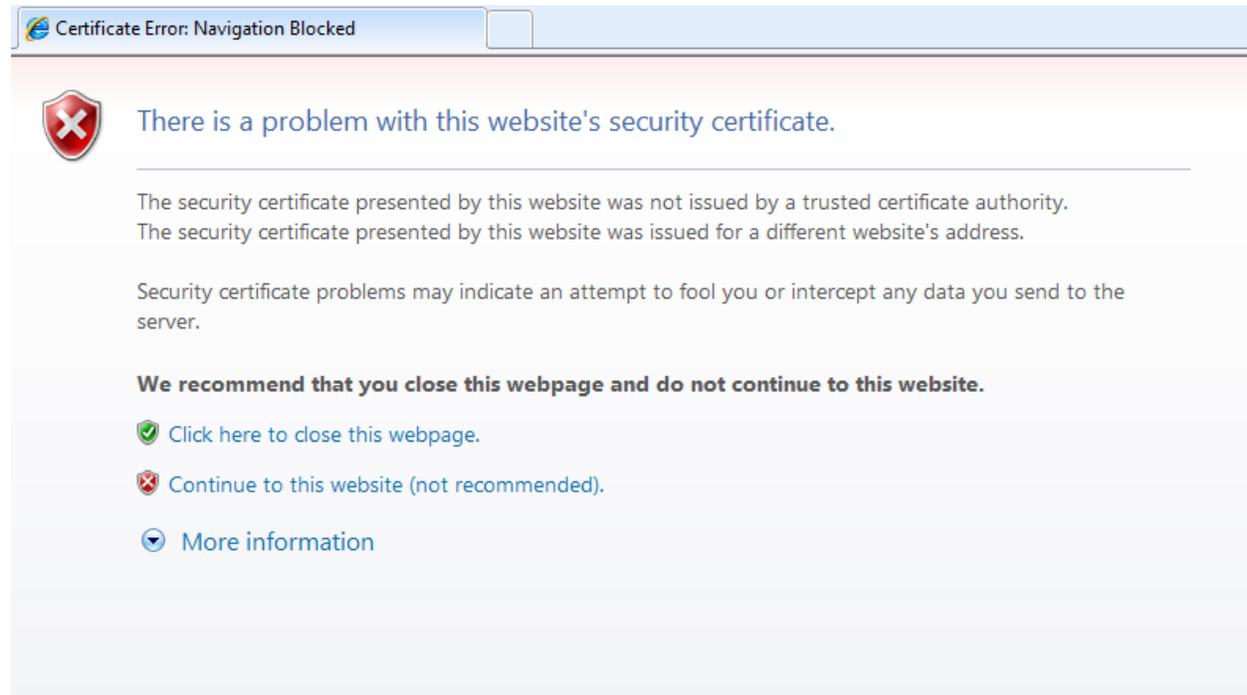

When accessing the network and Registration is required you will be prompted with this web screen. Please click on the link provided to begin the process:

Welcome to the network.

[Please click here to connect to the network.](#)

Internet Explorer environments will see this screen:

Certificate Error: Navigation Blocked

 There is a problem with this website's security certificate.

---

The security certificate presented by this website was not issued by a trusted certificate authority.  
The security certificate presented by this website was issued for a different website's address.

Security certificate problems may indicate an attempt to fool you or intercept any data you send to the server.

Firefox environments and Apple or MAC environments will see this screen:

### **This Connection is Untrusted**

You have asked Firefox to connect securely to **10.1.1.3**, but we can't confirm that your connection is secure.

Normally, when you try to connect securely, sites will present trusted identification to prove that you are going to the right place. However, this site's identity can't be verified.

#### **What Should I Do?**

If you usually connect to this site without problems, this error could mean that someone is trying to impersonate the site, and you shouldn't continue.

### ▶ Technical Details

### ▼ I Understand the Risks

If you understand what's going on, you can tell Firefox to start trusting this site's identification. **Even if you trust the site, this error could mean that someone is tampering with your connection.**

Don't add an exception unless you know there's a good reason why this site doesn't use trusted identification.
